Total Software Print  
Solutions

Producing high-quality print is just the beginning. To meet the needs of discerning clients seeking added value and sophistication, the AccurioShine 3600 is the ultimate solution. It allows you to create spectacular, irresistible print products that command immediate attention and set your work apart.

## YOUR ADVANTAGES WITH THE AccurioShine 360

Eco-friendly  
In-line led dryer

High productivity with  
single pass printing

Software  
Suite included

### AccurioShine 3600: Key Features

- High-Speed Embellishment: Digital finishing at speeds up to 2,077 A3 sheets/hour with rapid job setup.
- Premium Inkjet Technology: Powered by exclusive Konica Minolta piezoelectric print heads for superior quality.
- 2D & 3D Tactile Effects: Variable varnish thickness (116–21 microns) in a single pass for striking textures.
- Streamlined Workflow: Fully digital—no screens, plates, or dies required. Simply use a digital mask to print directly over toner or offset.
- Compact & Versatile: A space-saving solution for full production, prototyping, and spot UV varnishing.
- Eco-Friendly Design: A closed-circuit system that eliminates waste and reduces power, paper, and varnish consumption.

KIP the leading innovator in wide format printing and image capture technology. KIP is a major provider of wide format digital solutions for the architectural, engineering and manufacturing industries – solutions that deliver efficient, dependable, consistently high quality performance.

### Print Systems

The KIP print Systems features an innovative top stacking design that fits where you need it in tight spaces or against a wall, delivering easy access to all system features and enhancing workflow productivity.

### Color Scanner

The KIP scanner sets a uniquely high standard for speed quality and flexibility in a digital image capture system.

### Folding Systems

KIP folding and finishing systems automate wide format document folding requirements by providing folding, stacking and collation in a compact design.

Colortrac has been a pioneer and innovator in cost-effective color and monochrome wide format scanners. They are the first manufacturer to deliver affordable digital color image capture for large format copying and wide format scanning applications in the graphic arts, construction, engineering, GIS, mapping and many other large format scanner applications

### Colortrac SmartLF SC Xpress Series

A well-proven, innovative technology for great wide format image quality. Single Sensor is a US Patent protected Colortrac invention that combines CIS elements and LEDs in a single line for maximum scan accuracy and optimal illumination. Reliable and affordable scanning with a fast return on investment.

### Colortrac SmartLF SG Series

Experience an all new scanner with the same charge-coupled device (CCD) sensor technology used in professional quality cameras. Choose the highest quality scans for all your document types, and get it right the first time. Produce superior quality images and copies of documents up to 36 or even 44 inch wide. Scan all types of paper and mounted documents. Super easy adjustment for different media thicknesses up to 15 mm.

Matica Technologies develops, manufactures and markets proprietary high performance, mid-range and desktop solutions for industrial card personalization and card mailing systems. The Group offers a full range of alternative personalization and encoding technologies for banking, government, access control, ID and transportation applications.

## ID Systems

This extremely high resolution is perfectly serving the increased security printing demands in ambitious ID Card applications, such as National ID programs, Drivers License Programs and similar. Since most of these projects are requiring the personalization on both sides of the card, the XID series already comes with a factory built-in flipper module in the standard model. Your running costs low.

## 02 | LARGE FORMAT PRINTERS

The Professional Output Division at SAMIR is a leading supplier of large format printers and graphic design services and products.

Over the past decades, the division has been supplying the Saudi Market with premium quality services and products, including printers and supplies from well-known manufacturers (namely HP, KODAK, SEAL etc.), and dealing with major clients as the Ministry of Interior, Ministry of Defense, King Saud University, Saudi Airlines, King Abdulaziz University, etc.

Aiming at meeting the most demanding requirements across industries, the Professional Output Division always strives to provide its customers with leading edge printing technologies that satisfy their needs and demands. It continuously observes the market trends and maintains comprehensive consulting services and good availability to ensure prompt reaction times.

When dealing with the Professional Output Division at SAMIR, you can be assured of receiving prompt and satisfying professional support. The after-sales service, which is made up of a dedicated and responsive sales team, is ready to assist you in any way they can.

Do more, offer more on every dimension from a wide range of applications to high image quality and quick turnarounds.

Whether you need a solution to produce persuasive business graphics. A limited run of gallery quality images, or sign and display production volumes even the opportunity to address emerging applications like wall decoration or vehicle graphics HP solutions deliver the image quality, speed, ease of use, and productivity that can help you move your business forward.

## HP LATEX Printers

More applications. Same day delivery. Keep costs low. HP Latex printing can generate higher profit than ecosolvent with advantages including wider application versatility and prints that come out completely dry, allowing same day delivery. Buy in at an affordable price, and keep your running costs low.
